DETAILED ACTION

1. In the preliminary amendment, claims 1-11 have been cancelled, and new claims 12-24 have been added, therefore, claims 12-24 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U. S. C. 121:

- I. Claims 12-24, drawn to a synthesized peptide comprising one or more sequences selected from the group consisting of SEQ ID NO: 2, 3, 4, 5, 6, 7, 8 and 11; a synthesized peptide comprising SEQ ID NO:11; or an osteogenic accelerator comprising the peptide, classified in class 514, subclass 2, class 530, subclass 300, and class 523, subclass 115.

Applicant is required to select one amino acid sequence from claim 12 or 15, and identified with a "SEQ ID NO:". A peptide having any change at one or more positions is a distinct peptide. This is not species election. However, if there is a core sequence that unifies several sequences, applicants should point out this core sequence and the sequences comprising this core sequences with sequence identifiers. The examiner will then reconsider this restriction requirement to include the additional sequences for examination. Upon election, all other sequences will be withdrawn from further consideration by the examiner because these sequences are considered to drawn to non-elected inventions.

3. The inventions are distinct, each from the other because of the following reasons:

The claims are directed to distinct peptides or osteogenic accelerators comprising the peptides. Each peptide is patentably distinct because each amino acid sequence has different chemical and physical properties and produces different effect in the treatment.

Because these inventions are distinct for the reasons given above, and because Inventions require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Lawrence McClure on July 12, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
